

SAP NETWEAVER SOFTWARE DEVELOPMENT SERVICES

Value Proposition

Abilis PI has dedicated resources that are providing a variety of technical services for the SAP NetWeaver technology framework.

Our specific focus is on SAP Web Application Server custom software development and middleware solutions using SAP Process Integration (XI/PI).

Through our work we make development a predictable process, resulting in robust, quality software products that allow you to optimize your business.

Our Mission

We aim in offering the best quality centre of technical expertises with SAP's NetWeaver framework technology in North America.

We show commitment and responsibility to our clients to ensure the reliable delivery of required solutions.

We view clients as long term partners with whom we deliver successful implementations that achieve the envisaged positive leverage and ROI.

Our refined services and development management ensures quality, consistency, uniformity and value added solutions to our partners.

Key Strengths

- Combine business savvy with technical expertise
- Use proven standards and methodology
- Generate 25%-40% savings over offshore or in-house development
- Build innovative, flexible solutions over heterogeneous architectures

SAP Integration Architecture Using SAP PI

We have extensive integration experience in high profile projects using SAP PI and Open Source solutions (.NET, Java & C#).

We've contributed on establishing requirements, designing the infrastructure, developing solutions and running it in production environments of high availability, high criticality and high loads.

Outsourcing Partner

We specialize in SAP PI development and nurture the right people to do so...

Let us be your outsource partner and allow us to provide all development services to your organization that you need for projects, continuous improvement and operational support.

We continually have the right people skills available; we'll bring initiative to your organization to use SAP PI to its full potential.

About Abilis

Abilis is a group of nearly 200 employees worldwide headquartered in Montreal specialized in IT services and software development.

We have offices in Portland, ME and Albany, NY, as well as offices in France.

The group is composed of Abilis Solutions, Abilis New England, Abilis PI and Info-sys Solutions:

Abilis Solutions offers a wide range of IT services and software development solutions essentially in Canada.

Abilis New England delivers IT projects in state government, healthcare and the financial sector in the US.

Info-Sys Solutions provides field service solutions as well as management software solutions for the energy industry in North America.

Abilis PI offers services in SAP integration.
